Icon Index

Anti-microbial fabrication
Reduces the growth of bacteria causing unwelcome body odors. Without the discomfort of unwanted smells, you are free to feel even more confident in your clothing.

Tubular waistband
Allows for added security when loading up your pockets and acts as an interior belt.

wind resistant fabric
Wind-resistant fabric will provide a barrier against air penetrating the material and chilling your skin. It will resist light to moderate wind conditions.

evergreen style
These products are year round favorites that express the heritage Salty Crew style.

multi stretch
Fabric that stretched with the natural movement of your body. Providing comfort with unrestricted range of motion.

Water REPELLeNT coating
Offers protection and comfort from early morning mist to light sprinkles. This coating is able to repel water for a short time. Assits drying rate due to less absorbancy

Bamboo fibers
Highly absorbent, much more so and faster drying than cotton. In warm, humid weather, bamboo clothing doesn't stick to the skin. It keeps you drier, cooler and more comfortable.

utility Pocketing
For all utilitarian uses. Our heavy lined pockets keep your tools easily accessible without puncturing the short, pant, or your skin.

WELDED SEAMS
Radio frequency welded seams provide impenetrable construction preventing water and dust from entering.

uv protection
Protects against harmful radiation from UVA / UVB rays. We offer multiple fabrications with ratings from UPF 40-50+

breathability
Part of moisture management, fabrication is built to evaporate moisture from the skin into the air. Also can be loosley woven fabric which promotes airflow to keep you cool.

quick dry fabrication
Absorbs less moisture which results in quicker drying time.

taped seams
Used to cover the inside seam of the garment so that no water can leak through.

moisture wicking
Draws and moves moisture away from the body, evaporating on the surface of the fabric, keeping you cool and dry.

Roll-top System
Top load entry with wide mouth opening for easy access.

repreve recycled polyester
REPREVE® fiber is performance fiber made from recycled plastic bottles and helps us take sustainability further with performance technologies and embedded comfort.

REcycled Polyester
A sustainable fiber made from plastic waste.
